

Know changing policies.

Because you need to know how medical policy changes will impact your business, and how payers position your product, and your competition, TAMM Net is proud to announce our [Know More Policy App](#).

Don't miss important changes because you don't have time to search 50+ payor web sites each week. Don't wait until the denials come from field sales. Anticipate impact and proactively address issues. You'll know current Medicare and commercial payer policy and coverage changes. Our proprietary database does the work for you. Just tell us the key words and codes and check your inbox, the work is done.

We'll help you stay in the know with:

- Weekly alerts should any of the payer policies change
- Notification when draft policies are posted – providing an opportunity to respond during the comment period
- 90-day notification of when your medical policies are scheduled for review
- Email notification of important events such as CMS open door meetings, coverage and payment meetings as well as ICD-10, HCPCS
- Email notification when registration is open for AMA CPT editorial panel meetings

All deliverables will be sent via email in a written report highlighting relevant information. Comments about a given medical policy will be accompanied by that policy.
